ATTENTION WALLINGFORD WATER CUSTOMERS

The Water Division will continue its annual water main flushing program and will be flushing on a Monday through Friday schedule between the hours of 7:30 A.M. and 5:00 P.M.

This flushing program will remove harmless deposits of accumulated sediment and rust, and is necessary to improve and maintain water quality. Please note that during the flushing activities, Water Division staff will monitor the surface water reservoir levels during the flushing operations to ensure that abundant storage is maintained.

The areas to be flushed beginning Monday, August 20, 2018, will be the following:

Zone 5: All streets west of North Elm Street, east of the Wilbur Cross Parkway and north of Center Street/Hall Avenue, including North Main Street and North Main Street Extension, North Colony Road, Washington Street, North Plains Industrial Road, Church Street (W), Christian Street, North Street, Barnes Industrial Park North and South, Yale Avenue, and all other streets in these areas.

Flushing of this area should take about four weeks.

Important: Please check the condition of the water before use, since discoloration of the water and lowered water pressure may occur during flushing.

This notice will also be carried by Government Access Channel 20 on Comcast Xfinity or Position 99 on Frontier TV, and posted on the Wallingford Town website (www.town.wallingford.ct.us at "News/Announcements" of "Water Main Flushing Program") and will be updated as necessary.

If you have any questions or require additional information about our flushing program, please contact our office at 203-949-2660.
